a person's understanding and experience of their own gender

everyone has

do not need  
to be  
confined

gender is  
self  
determined

# Sex Assigned At Birth

the sex given to a child at birth, most often based on the child's external anatomy.

male

attached

gender identity  
can sometimes  
inform one's  
gender  
expression

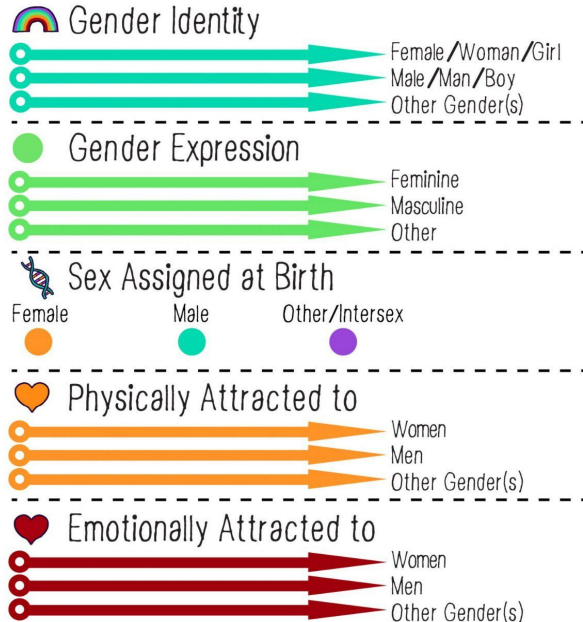

gender  
expression  
doesn't dictate

# Respecting Names and Pronouns

(Created by Finn McRae and Josh Walinsky of the HITS eLearning Team)

# The Simplest Form of Allyship

*“Hi, I’m [enter your name].  
I use [enter your pronouns].”*

# Gender Neutral Language

use they // them  
OR their name  
until you know a  
person's pronoun

you might see pronouns  
that you're not familiar  
with & in that case, ask!

instead of using  
honorifics like  
mr. miss mrs;  
use a person's  
name!

# Gender Neutral Language

mr. // mrs. // ms. // miss

hey guys! // ladies!

husband // wife

son // daughter

maternity // paternity

use a person's name or don't use honorifics at all!

hi ya'll! // team // friends // everyone!

partner // spouse

kids // children

parent // parental

**apologize, correct yourself  
& move on! **

some general  
best practices

# Discussing Identity

Some people may choose not to disclose their attractionality or gender identity

Behavior & identity are not always the same!

Some people might sometimes reject labels

When working with patients, students, and colleagues, discuss their comfort with others knowing their SO & GI

# Avoid Making Assumptions

gender identity  
≠  
attractiveness

You cannot always  
correctly guess  
someone's **SO** or **GI**  
based on their name, or  
how they look or sound

gender  
identity &  
attractiveness  
can be  
~~~fluid~~~

People should always be identified with their chosen  
name and pronouns  
(that corresponds to their gender identity and expression)

**even when they are not present!**

\*\*\* if you misgender or use a wrong name, apologize,  
correct yourself & move on! \*\*\*
